

Summary and recommendations

EPN AC Workshop
Brussels, October 25-26, 2017

- 1 Troposphere modelling:
 - The proposal that all ACs use the VMF1/ECMWF approach for troposphere modelling
 - ACs should estimate troposphere gradients and include results in SINEX-TRO files
- 2 Improving rapid product:
 - ACs asked to start submitting rapid solutions
 - ACs may also consider to add more stations to rapid solutions
- 3 Processing Galileo data:
 - recommendation to include Galileo data?
- 4 Other issues, comments?
